Report of the Council.

The rules of the Society provide that at each Annual Meeting the Council shall submit to the members a report of the proceedings of the Institute during the previous year. In compliance with this regulation, the following statement has been drawn up for presentation to the meeting:—

MEMBERS.—The number of members elected during the year has been 22. On the other hand, the number of names withdrawn from the roll has been 36; 4 from death, 26 from resignation, and 6 from non-payment of subscription for more than two consecutive years. There has thus been a net loss of 14, the number on the roll having been reduced from 370 to 356. The Council are sorry to report a reduction in the membership; but a similar decline has taken place in the other incorporated societies, and is probably an inevitable consequence of the present troublous times.

Among the members removed by death the Council regret to mention the names of Archdeacon Walsh, who has been a frequent contributor to the Transactions during the 27 years he has been associated with the Society, and who has made many important donations to the collection of Maori antiquities in the Museum; of Mr. W. R. Bloomfield, who was lost in the disastrous wreck of the "Empress of Ireland"; of Mr. W. S. Cochrane; and Mr. E. Bond.

Finance.—Members who desire to obtain full information respecting the financial position of the Institute will doubtless consult the balance-sheets accompanying this report; but the following brief synopsis may be of use.

The total revenue of the Working Account, excluding the balance in hand at the commencement of the year, has been £1,550 17s 7d. Last year the amount was £1,862 0s 2d; but, as pointed out at the time, that sum included the exceptional item of a Government subsidy for £250, in addition to arrears of interest and rents properly belonging to the previous year. Taking these items into consideration, it will be found that the revenue for the year is not far below that for 1913-1914. The

amount received under the head of members' subscriptions has fallen from £334 18s to £322 7s, and there is an apparent reduction of £37 12s 6d in the receipts from the Costley Bequest, and of £16 10s 8d in the returns from the Museum Endowment, but both are mainly caused, as hinted above, by the payment of arrears in the previous year. On the other hand, a new item of revenue appears in the returns from the Campbell Bequest. The expenditure has been unusually large, amounting to £1,691 19s, as against £1,590 10s 2d for the previous year. The increase is due to the numerous purchases made for the Museum, and to the cost of the show-cases required for their exhibition. The balance in hand amounts to the satisfactory sum of £281 8s 7d.

Turning to the invested funds of the Society, the position must be regarded as satisfactory. The legacy of £1,000 bequeathed by the late Sir John Campbell, paid over by the Campbell Trustees during the previous year, has been suitably invested, and is now yielding its full revenue of 6 per cent. A further sum of £355 has been derived from the sale by the Government of certain Museum Endowments, and has also been invested. From these two sources the Capital Funds of the Institute have been raised to the sum of £18,181, thus securing an increased revenue in the future of nearly £100 per annum.

VISIT OF THE BRITISH ASSOCIATION.—In last year's report it was stated that arrangements had been made by the New Zealand Government to invite a number of the leading members of the British Association to visit New Zealand after the close of the Australian meeting, with the object of holding a short supplementary meeting in New Zealand. But the unforeseen outbreak of war, and the military preparations that at once became necessary, compelled the Government to cancel the greater part of these arrangements, and, in particular, to abandon the idea of an official meeting of the Association in the Dominion. After the break-up of the Australian meeting, however, a considerable number of members of the Association were able to visit New Zealand, and no small number of lectures or addresses were delivered in the various centres. Six of these were given in Auckland under the auspices of the Institute, and were fully appreciated by the citizens, securing in each case a large and representative audience

Meetings.—Including the British Association lectures just alluded to, eleven meetings have been held during the year. The greater number of these were delivered in St. Andrew's Hall. Symonds Street, a building which as regards size and position has proved very suitable for the purposes of the Institute. The following is a full list of the lectures and papers contributed:—

7

- The Art of Road-making: Past, Present, and Future.—By F. E. Powell, C.E.
- Petroleum and its occurrence in New Zealand.—By J. L. Strevens, late Chief Chemist to the Taranaki Old Field.
- The European Crisis, its Historical Aspects.—By J. P. GROSSMANN, M.A., Lecturer on Economics and History at the Auckland University College.
- 4. The Old Education in a New Country.—By Prof. J. J. Findlay (British Association Lecture).
- Heredity and Eugenics.—By Dr. C. B. Davenport (British Association Lecture).
- Heredity and Responsibility.—By Prof. E. G. Conklin (British Association Lecture).
- English Universities and Public Schools.—By Dr. H. B. Gray (British Association Lecture).
- 8. Some of the Properties of an Electric Current.—By A. Wylle, Electrical Engineer to the City of Auckland.
- Explosions.—By Professor H. B. Dixon, F.R.S. (British Association Lecture).
- Anaesthetics in Military Surgery.—By Professor A. Waller, F.R.S. (British Association Lecture).
- The Prothallia of three New Zealand Lycopods.—By Miss K. V. Edgerley, M.A.
- Descriptions of new species of Flowering Plants.—By T. F. Cheeseman, F.L.S.
- Notes on Aciphylla, with descriptions of new species.— By T. F. Cheeseman, F.L.S.
- 14. The Ferns of Mangonui County.—By H. Carse.
- 15. Descriptions of New Native Phanerogams.—By D. Petrie.
- Some additions to the Flora of the Subantarctic Islands.— By D. Petrie.
- 17. Records of borings at Horotiu.—By J. R. HETHERINGTON.
- The Mollusca of the Kermadec Islands.—By W. R. B. OLIVER.

- A Comparison of the Land Mollusca of the Kermadec Group with that of Norfolk Island.—By T. IREDALE.
- A Commentary on Suter's Manual of the New Zealand Mollusca.—By T. IREDALE.
- New Genera and Species of Coleoptera.—By Major T. Broun.

Those of the above that were prepared for publication in the Tanasactions of the New Zealand Institute have been forwarded to the Editor, and will probably appear in volume 47, now being sent to press. Volume 46, which includes the papers read before the various Incorporated Societies during 1913, has been issued and distributed among the members.

Museum.—With the exception of a few days necessarily devoted to cleaning and rearrangement, the Museum has been open to the public throughout the year. The attendance of visitors has been good, although not quite equal to the standard of the two previous years. Taking the Sunday attendance first of all, the Register kept by the Janitor shows that 22,314 people entered the building on that day, being an average of 429 for each Sunday. On the eight chief holidays of the year there was a total attendance of 4,197, being a daily average of 524. The greatest attendance on any one day was 1,031 on Good Friday, followed by 844 on Easter Monday, and 749 on Labour Day. It is impossible to give the actual attendance on ordinary week-days; but taking occasional counts as a basis of calculation, the average number of visitors per day can be safely estimated at 210, which would give a total of 64,050. If this number be added to the figures given for Sundays and holidays, the total number of visitors for the whole year will be 90,561. Last year the number was estimated at 93,857. It is worthy of remark that the attendance during autumn and winter greatly exceeded that of the previous years, and that but for a singular diminution commencing at the time of the outbreak of war, and lasting until the Christmas holidays, the figures for the year would have been the highest recorded.

Much progress has been made in the Museum during the year. The additions received by purchase or donation have been numerous and important, while a large amount of material has been derived from collecting trips made to various portions of the coast. Perhaps the most attractive addition to the Zoological Department is a special group illustrating the life history of the Spotted Shag (Phalacrocorax punctatus). It contains numerous specimens of adult males and females in full breeding plumage, together with young birds in various stages of growth, nests, and eggs, and is an exact representation of a portion of a

AIM Ann Report

9

Shag Rock, in the Frith of the Thames, which is a great breeding colony of the species. The whole of the specimens, with all their accessories, were brought from this locality by Mr. Griffin, and have been very realistically mounted by him. The painted background is the work of the well-known artist Mr. Kennett Watkins.

Two other conspicuous additions consist of a fine specimen of the Mako shark (Lamna glauca), from which species the Maoris obtained the teeth so regularly worn by them as ear-ornaments; and an equally good example of the singular Thresher shark (Alopezias Vulpes), in which the length of the tail greatly exceeds that of the body. Several smaller fishes have also been mounted by Mr. Griffin and placed on exhibition. Reference should be made to a fine specimen of the Kakakura variety of the Kaka Parrot, presented by Mr. C. Davis; and a similar example of the Australian Shrike (Grancalus melanops) obtained in Taranaki, and donated by Mr. B. F. Booker. Neither of these birds was previously represented in the Museum.

One of the most interesting and instructive additions received during the year is an exhibit prepared by the Auckland Harbour Board for the recent Exhibition, showing the damage caused to wooden wharves by the *Teredo, Limnoria*, and other genera of marine borers. After the close of the Exhibition, the whole collection, together with its plate-glass showcase, was very kindly presented to the Museum by the Harbour Board.

Several important donations have been made to the Geological Department. The Talisman Gold Mining Company has presented a large series of auriferous lode specimens and minerals, arranged in a neat plate-glass show-case. This also was originally prepared for the Auckland Exhibition, and at its close was transferred to the Museum. An extensive set of named New Zealand fossils, likely to prove of considerable value for purposes of comparison, has been presented by the Geological Survey, but has not yet been unpacked, want of space and case-room making its exhibition at the present time quite impossible. Several minor collections, particulars of which are given in the appended list of donations, have from necessity been treated in a similar manner.

The Maori collection has been largely increased during the year. The most important accession is a series of 336 greenstone, bone, and ordinary stone articles collected by Mr. F. R. Smith, with the assistance of Mr. C. Arnold and others, at Murdering Beach and other localities near Dunedin, in the years between 1874 and 1878. After the death of Mr. Smith, the collection passed into the hands of his widow, from whom it has now been purchased. Many of the articles are distinct acquisitions to the Museum; and the whole collection is valuable as coming from a different area to the majority of specimens already in the Museum, thus showing local differences of workmanship. It is satisfactory to announce the purchase from Mrs. Hanby of a superbly carved whakapapa, or genealogical tree, originally obtained many years ago by Captain Preece in the Urewera Country during the Maori War. Such articles are among the rarest of Maori productions, and the present example is one of the finest Another acquisition of considerable importance is an unusually large and boldly carved Hei-tiki, formerly in the possession of the well-known chief Hongi Hika. It was purchased out of the surplus funds of the defunct Auctioneers' Association, at the desire of its president, Mr. H. E. Vaile, and presented to A donation of some interest has been received the Museum. from Mr. John Kenderdine, in the shape of an elaborately carved "Ipu," or box used for holding preserved birds or other objects, and an "Oko," or bowl used for serving up food at a feast. Both these articles were detected by Mr. Kenderdine on the shelves of an obscure curio shop in Sydney, and secured by him for presentation to the Museum. From Mr. G. Graham, who for many years has been a constant contributor to the Museum, comes a remarkably fine carved Korere, or funnel used for giving liquids to a chief when the operation of tatooing rendered the lips too sore to admit of drinking in the ordinary manner; and also several ancient fish-hooks and other articles. Captain Bollans, of the s.s. "Hinemoa," has kindly given an interesting series of articles carved from pumice-stone, found on Portland Island; several ancient bone fish-hooks, bone barbs, and spreaders; also a series of ten grinding stones,

Among many other articles of interest the following should be specified:—A remarkably fine bowl, probably stone-carved, for many years the property of Mr. John White, and now purchased from his widow; a beautiful specimen of the rare Kakakura Cloak, presented by Mr. Henry Brett, and of which only one other perfect example exists in the Dominion; a series of ancient fish-hooks, mostly found at Whangaroa, presented by Mr. Henry Winkelmann; an ancient carved Maihi, and 13 old Maori spades, donated by Mr. T. E. Smith; and finally a stone Toki, or adze, much larger and more finely finished than any other example previously existing in the Museum, presented by Mrs. S. R. James.

Quite apart from the reception of new additions and their arrangement for exhibition, a considerable amount of work has been done in the Museum, and many improvements effected. The collection of New Zealand birds has been overhauled, cata-

logued, and supplied with new printed labels prepared by the The type collection of minerals has been removed from the show-cases to allow the latter to be recleaned and repainted, and has been rearranged therein. The large Animal Cases in the Main Hall have been opened, cleaned both internally and externally, and the woodwork renovated. Many improvements have been made in the arrangement of the exhibits in the Maori Hall. Attention may be specially drawn to a new show-case, in which the fine series of Fish-hooks and Fishing appliances have been displayed; also to another case in which no small number of specimens illustrating the methods followed by the Maoris in the cutting and polishing of Greenstone have been placed. In addition to the above, several hundreds of descriptive printed labels have been prepared by the Curator, a work demanding much time and research. Finally, several minor changes have been made in the foreign ethnographical room. In short, the year has been one of considerable activity and energy, and has produced a corresponding advancement in the Museum.

This is not a suitable time to enumerate the many drawbacks and disadvantages, mostly caused by insufficient space, which impede the progress of the Museum, and which the natural growth of the collections brings into greater prominence every year. No enlargement of the buildings can be hoped for during the continuance of the war, or until a period of less financial stringency arrives. So far as a limited amount of additional room is concerned, however, it has been suggested that fuller use might be made of the present Statue Hall; and a Committee of the Council has been appointed to discuss the matter with the Curator, and to report at an early date.

LIBRARY.—The annual balance sheet shows that an expenditure of £197 2s 8d has been incurred on the Library during the year, £105 of which has been derived from the Mackechnie Library Bequest, and the remainder from the ordinary revenue of the Society. A consignment of about 60 volumes ordered from London was received last June, catalogued, and placed in the A second order of somewhat similar extent was delayed for a time owing to the outbreak of the war, but is now being despatched from London, and will probably arrive about the end of March or beginning of April. In addition to the purchase of books, the magazines and serial publications subscribed to by the Institute, a list of which is given elsewhere, have been regularly received and made available for the use of readers in the Library. Some considerable expenditure has been incurred in binding the yearly sets derived from this serial literature, over 50 volumes having been placed in the Library from this source alone. The usual presentations and exchanges have been received from foreign societies, in addition to various donations from private individuals. A full list of all additions is appended to the report

As the whole of the shelf-room in the Library has been gradually absorbed during the last three or four years, a new press has been erected, capable of accommodating from 750 to 800 This is the last addition of the kind that can be accommodated in the present room, but it will probably suffice for a couple of years or a little more. It is difficult to say how space for the natural growth of the Library can be found after

the expiry of that period.

Conclusion.-In conclusion, the Council have to thank the members for the assistance and countenance they have given to the work of the Institute, and for the evidences they have shown of interest in its proceedings. They also wish to record the grateful thanks of the Society for the many donations made by members and others to the Museum and Library, and to express their gratification at the fact that such donations are steadily increasing from year to year. But it is also their duty to remind the members that in these days, when all eyes are turned upon the European War, and when financial stringency and retrenchment are everywhere prevalent, there is undoubted danger of the public support to deserving institutions being curtailed. Under these circumstances, it may be advisable to reiterate the claims which the Auckland Institute and Museum can advance for a continuance of such support and its expansion in the future, and which can be roughly arranged under three heads. It provides every year a system of public lectures, free to all-comers, on scientific subjects. It maintains a scientific library, in which the chief books published on science and its applications are regularly placed; many of these books being the only copies that find their way to Auckland. Lastly, it provides a public Museum, open every day without any restriction whatever, within which a vast amount of information on the natural history, productions, and resources of the Dominion is given in an orderly and convenient sequence, and within which are officials ready and willing to give any verbal explanations that are needed. The usefulness of the Museum is abundantly proved by the fact that it is visited every year by nearly 100,000 people, and that probably not far from 1,000 special inquiries made by visitors are attended to. Another argument, not often advanced, can be given in favour of Museums and Art Galleries is the fact that they are true indoor parks, available for the recreation of the public at those times when wet or stormy weather makes outdoor exercise difficult or inadvisable, and precludes the use of parks properly socalled. The Council claim that at such times, and at all times, it can be truly said that the citizens of Auckland can find within its Museum much to interest, to learn, and to instruct.

The Treasurer in Account with the Auckland Institute and Museum Trust Board.

Form of Bequest.

I give and bequeath to the Institution known as the Auckland Institute and Museum the sum of £ free of succession or estate duty, to be applicable for the general purposes of such Institution. And I declare that the receipt of the Treasurer or the proper officer for the time being of such Institution shall be a sufficient discharge for the same.

List of Benefactions

made to the

Auckland Institute and Museum

of an amount (or value) exceeding £50.

£2,026 subscribed by the citizens of Auckland towards meeting the cost of the first portion of the present Museum Buildings. (This sum included two donations of £500 each from Mr. Justice Gillies and the Hon. T. Williamson.)

1876.

Presentation made by Mr. R. C. Barstow of a large and varied collection of Maori articles, including flax and dog-skin cloaks, carvings, greenstone ornaments, bone and stone meres, fish-hooks, etc., etc.

Bequest from Mr. G. F. Edmonston of 564 volumes of standard works on Physical and Natural Science.

Donation from Mr. T. Russell, C.M.G., of 34 plaster-casts and busts from the antique.

1878

£106 donated by Mr. J. C. Firth to cover the expense of show-cases in the Museum.

1879-1883.

Mr. J. T. Mackelvie presented 260 volumes of books relating to the early history of New Zealand; 130 volumes of miscellaneous scientific works; a collection of ethnographical specimens from the Swiss Lake Dwellings; and 40 picked mineral specimens.

Bequest from Mr. Edward Costley of £12,150.

Bequest from Mr. David Nathan of £100.

Bequest of Maori articles from Mr. C. O. Davis, comprising dog-skin and feather mats; taiahas, paddles, spears; bone and wooden meres; carved boxes; and a variety of other articles.

18

Donation of £100 from Mr. T. Russell, to cover the expense of forming a collection of geological specimens from the Cape Colville Peninsula.

Japanese Shinto Shrine, elaborately lacquered and decorated, presented by Mr. L. D. Nathan.

1901-1902

 $\pounds 1,000$ subscribed by the citizens of Auckland for the purchase of the Mair Collection of Maori Ethnographical Articles.

Bequest of £2,500 from Mr. E. A. Mackechnie (£2,000 to be invested in order to produce an income for the purchase of books for the Library of the Institute; £500 to be expended in providing groups of the larger mammals and the necessary show-cases.)

£662 subscribed by the citizens of Auckland for the purchase of Mr. Fenton's elaborately carved Pataka, and for the purchase and erection of the Runanga House, Rangitihi.

£684 subscribed by the citizens of Auckland for the purchase of ancient historic Maori Carvings; and for other additions to the Museum.

Bequest of £1,000 from Sir John Logan Campbell.

Donation from Mr. Henry Shaw of 62 volumes of Geographical and Scientific works, and of 110 volumes from Mr. F. Shaw.

. Unusually large and complete collection of Kauri Gum, containing 400 examples, together with the plate-glass show-case containing the same, presented by the Hon. E. Mitchelson.
